ETS Aviation and BSI work towards efficient solutions for aviation verification

April 30, 2010:

ETS Aviation provides the software AVIATION FOOTPRINTER designed exclusively for the aviation industry as a simple-to-use carbon accountancy system. Accessible from anywhere in the world, 24 hours a day, 7 days a week it is the perfect tool for emissions reporting, analysis and audit. It supports a fuel saving program and makes handling the data easy.

Andrew Morris, Business Development Director at BSI said, "The addition of ETS Aviation's specialist knowledge of the aviation industry will add real value to our Associate Consultant Programme and we are happy to be working with them."

David Carlisle, CEO of ETS Aviation, said, "We are delighted to have joined the BSI Associate Consultant Programme. Regulatory compliance is proving a challenge for many airlines. With our technology and expertise, however, all the required data gets properly organised ready for verification. I'm confident that our approach will help deliver a very cost-effective solution to regulatory compliance for operators of all sizes."
